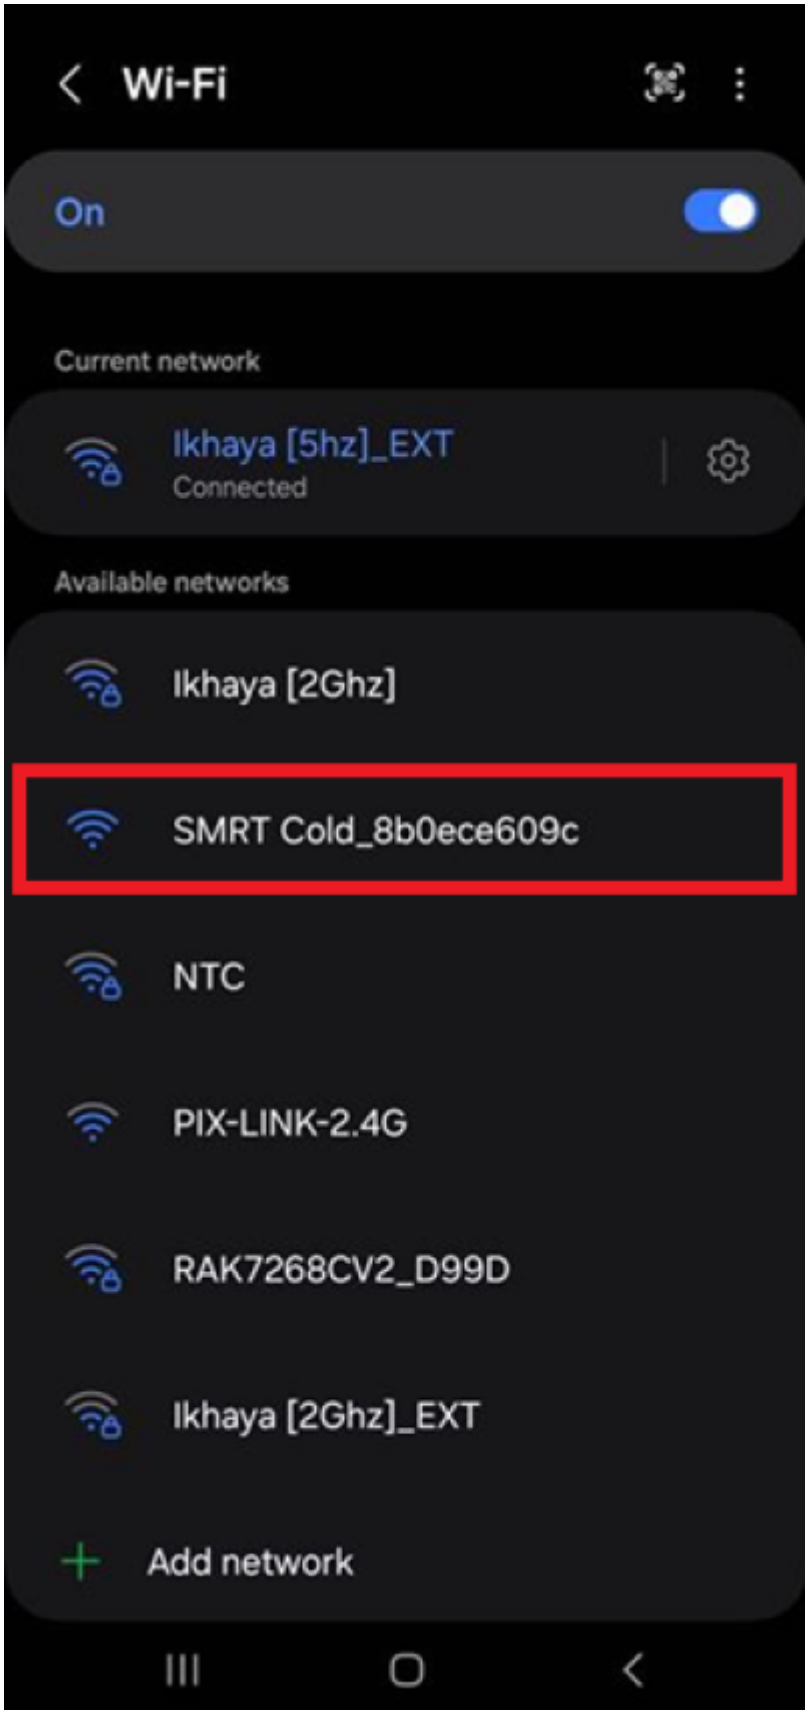
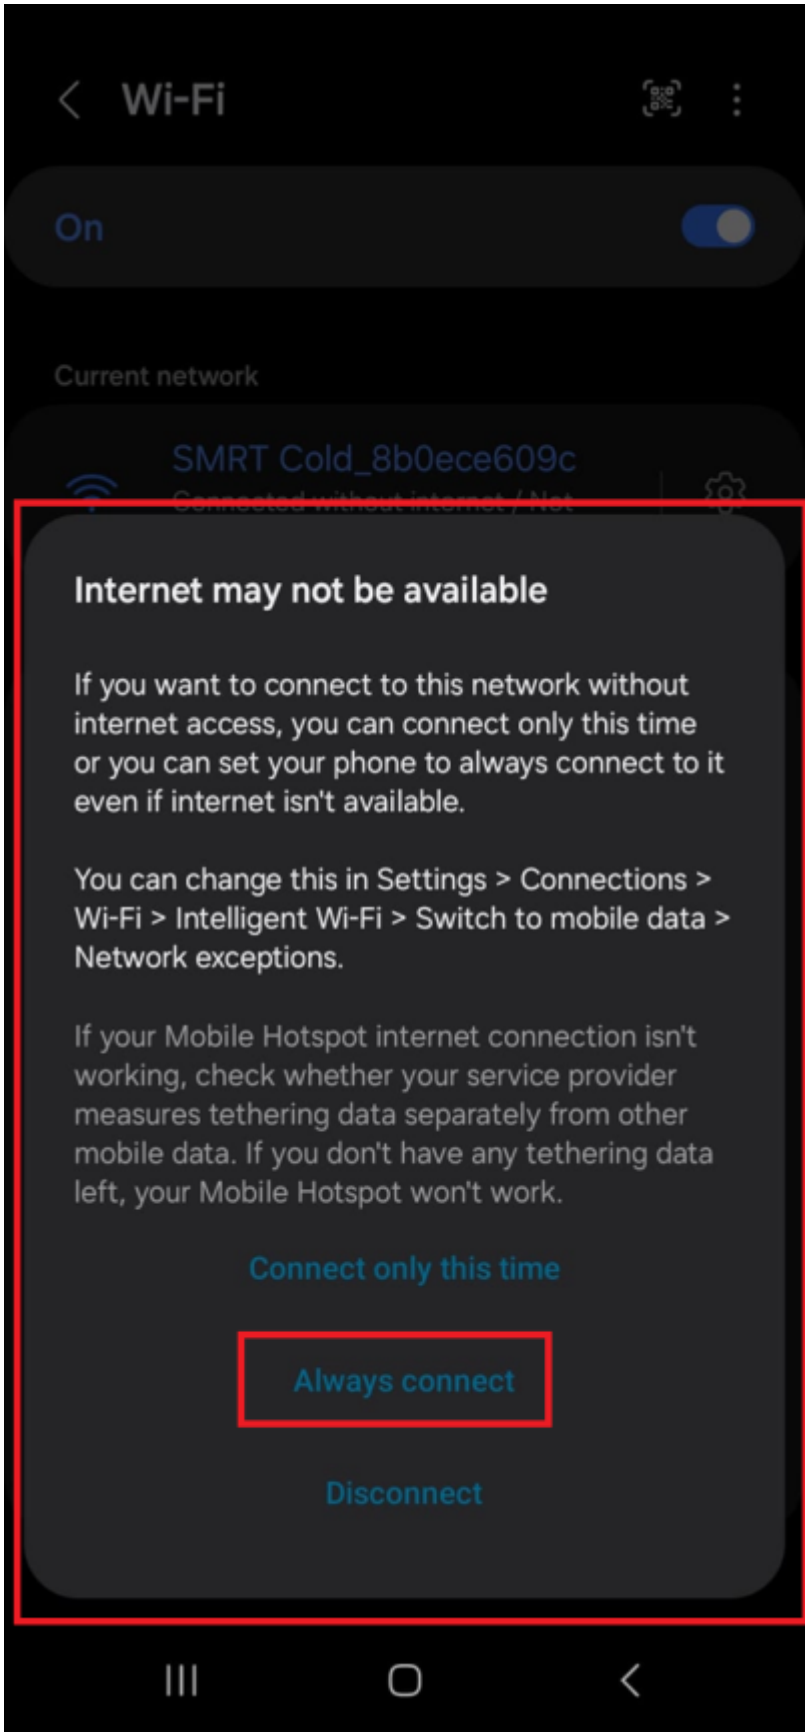
Samsung AP Connection

Power on the unit (Power-cycle the unit if it is already on)
When the LED is **red** press the button once
The LED will start flashing **red**
A WiFi access point should be visible **smrtcold_xxxx**

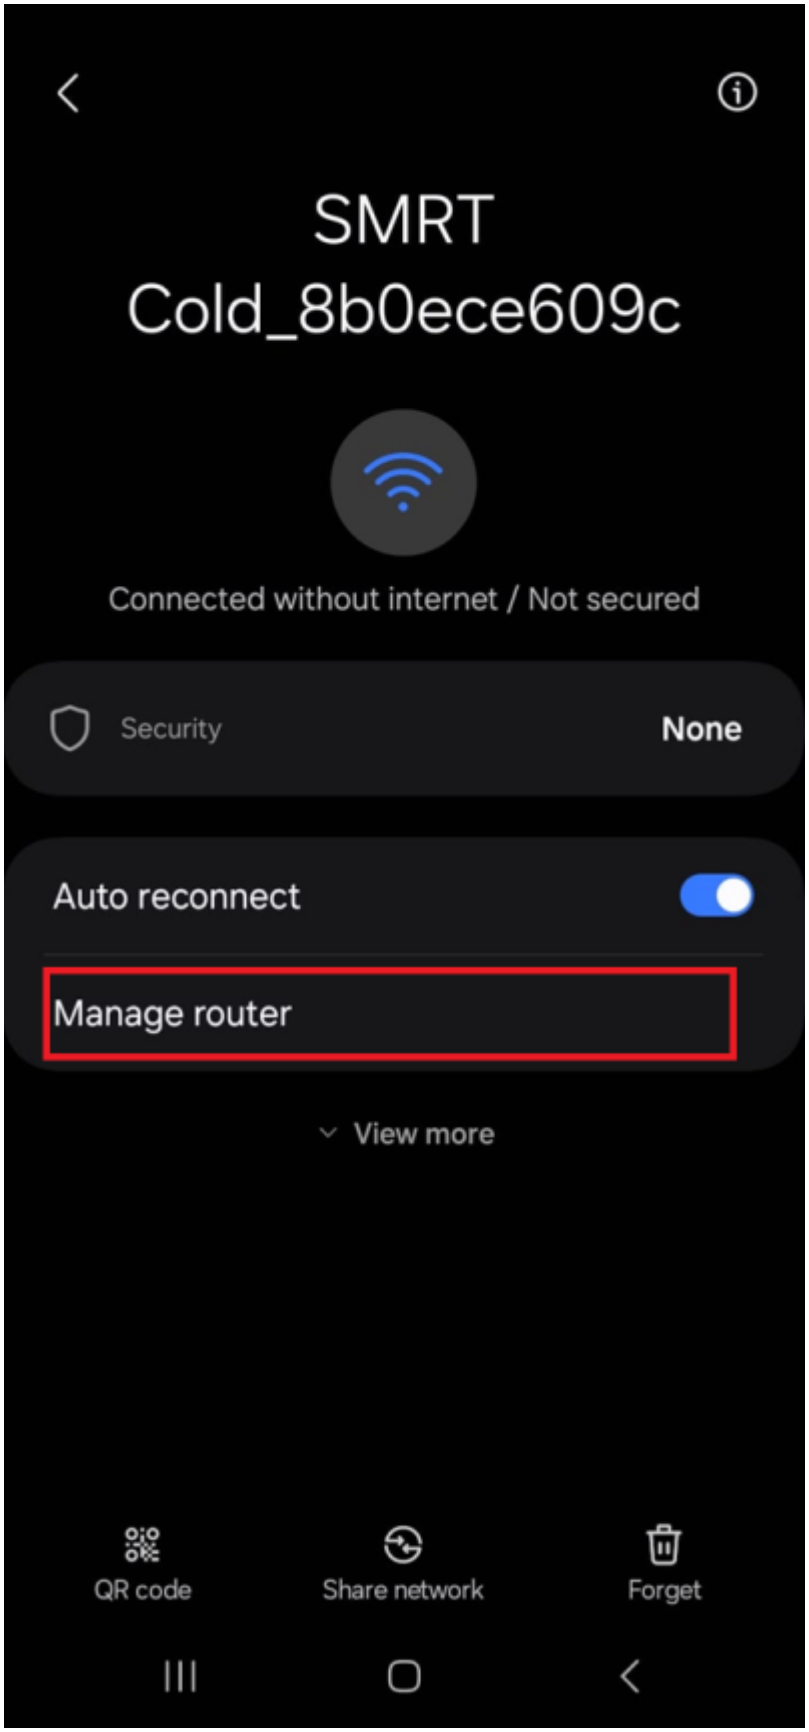


Connect to the access point

Wait for a prompt stating that the connection has no internet select **Always Connect** or **Keep Wi-Fi Connection**



Open via Wi-Fi settings Navigate to System Wi-Fi settings (Tap on the WiFi network from quick Wi-Fi settings)
Tap on the name or the cog icon
Tap Manage Router



The configuration page will auto now open, alternatively type 192.168.4.1 into your web browser
