

Ikhaya Automation Systems Alert Notification Bot

Overview

This guide explains how to set up and use the Ikhaya Automation Systems Telegram bot to receive alerts.

How to Use

1. Install Telegram.
2. Add the bot to your contacts:
 - Search for **"mfol_bot"** using Telegram search.
 - Select the bot and add it to your contacts.
 - Press **Start** to begin interacting with the bot.
3. You can now send commands to the bot.

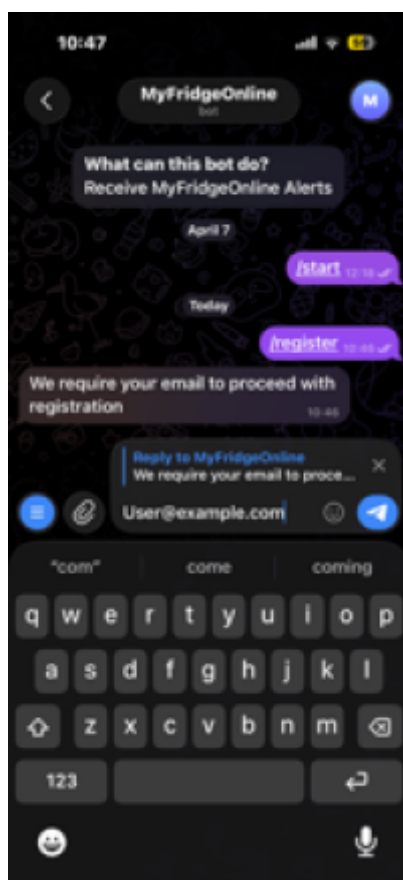

Registering to Receive Alerts

1. Send the command:

```
/register
```

1. The bot will prompt you to enter your email address.
 - Enter the email used to register on the **Myfridgeonline platform**.
2. The bot will send an authorization email.
 - Click the **Verify** button in the email.
3. Registration is complete.
4. You will now receive alerts via Telegram.

Registering a Telegram Group to Receive Alerts

1. Add the bot to your Telegram group as a member.
2. Send the command in the group:

```
/register
```

1. The bot will prompt for an email address.
 - Enter the email used on the **Myfridgeonline platform**.
2. An authorization email will be sent.

- Click the **Verify** button.
 - 3. The Telegram group is now registered to receive alerts.
-

Configuring Alert Groups

1. Registered Telegram accounts will appear in the **Contact** option box.
 2. Add the desired contact to the alert table.
 3. The selected contacts will now receive alerts.
-

Notes

- Ensure the email used matches your Myfridgeonline account.
- The bot must remain in the group to continue receiving alerts.
