

Sensor Dashboard

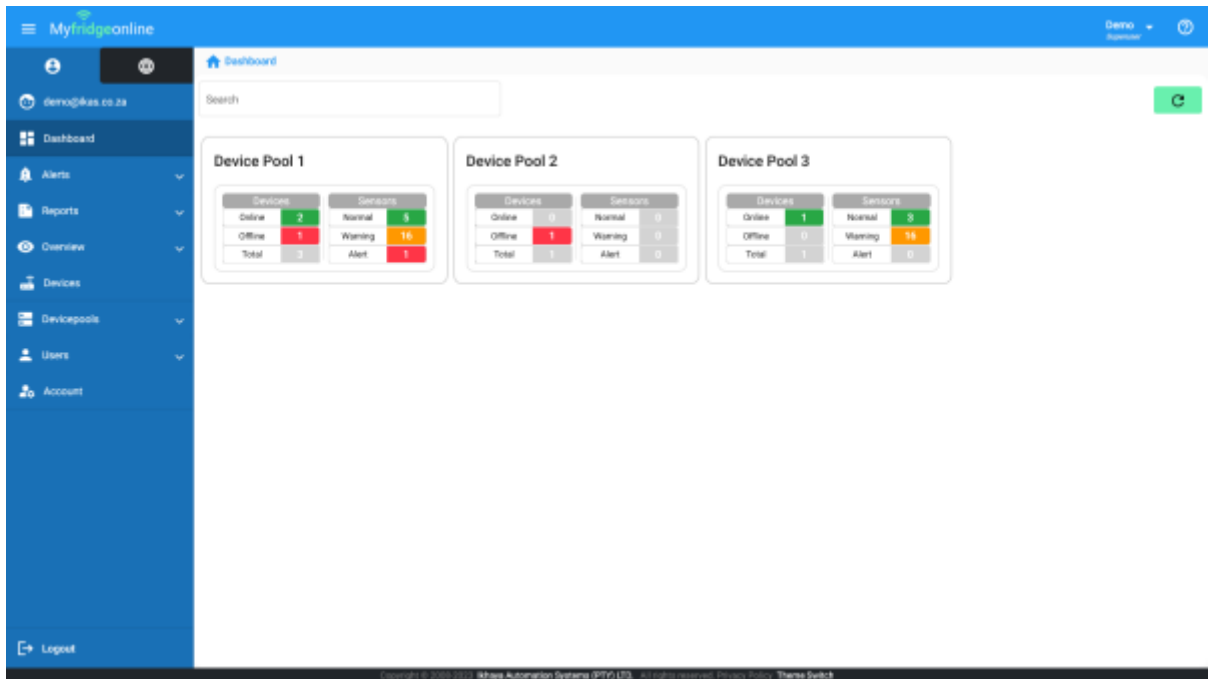

Navigation

The Sensor Dashboard can be accessed from the side navigation bar by clicking on 'Dashboard'. This is also the first page seen when logging into the website.

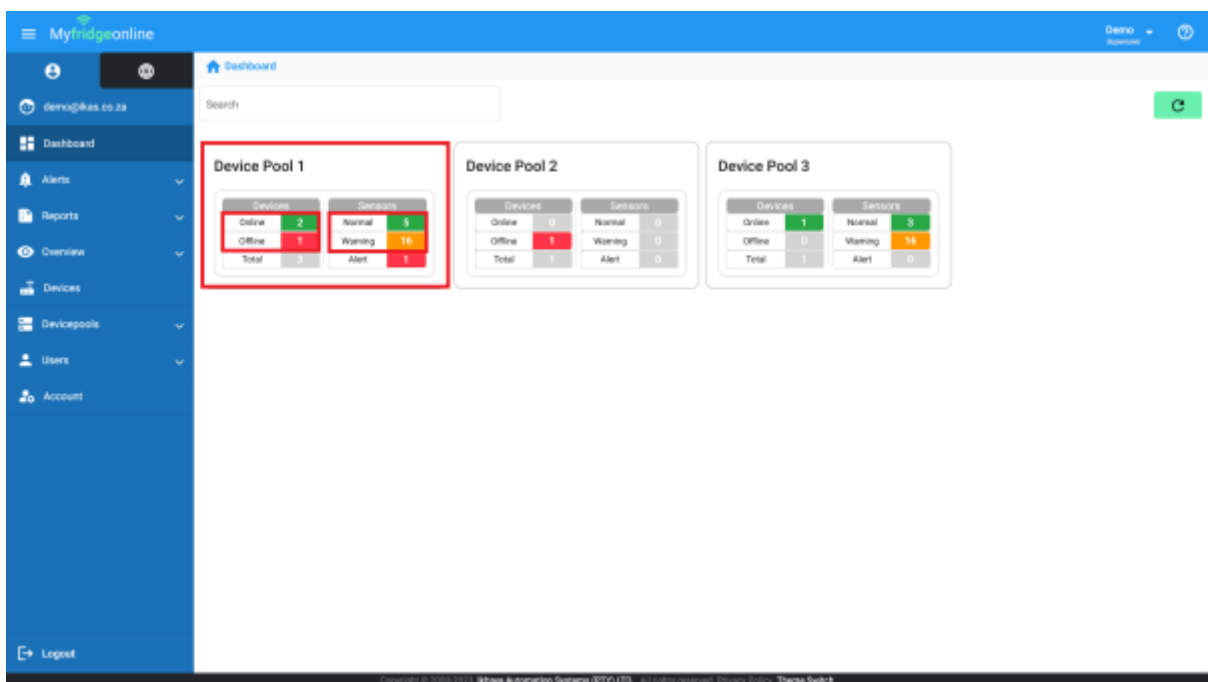

Overview

On the Sensor Dashboard page, information about your device pools, devices and sensors are displayed. You can view the overall status of devices and sensors within a device pool.

Viewing A Device Pool

Clicking on a device pool will route you to the [Devicepool View](#) page. Clicking on 'Online', 'Offline', 'Normal' or 'Warning' will also set the filter on the page automatically to match your selection.
