# Allocating A Devicepool

## Overview

Here you can create and allocate device pools to the selected devices. You can view the currently selected devices from the Devices field.

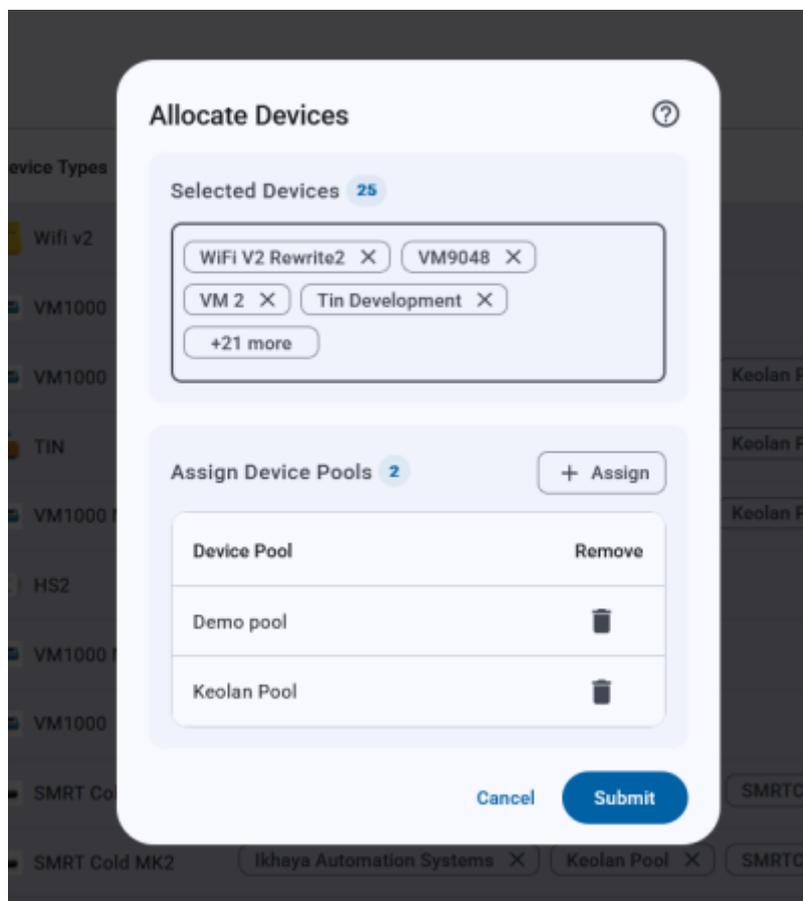

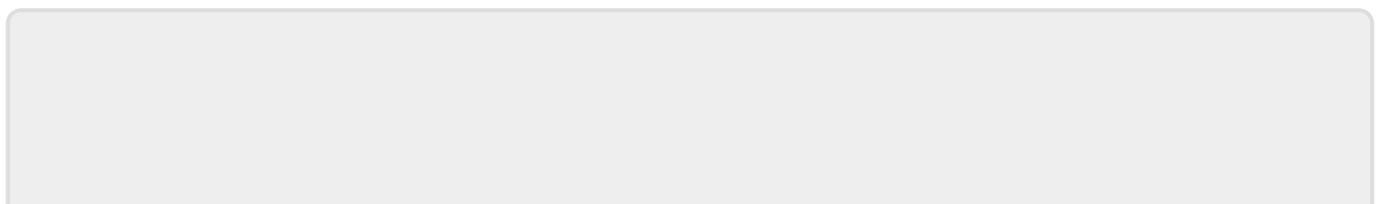

Allocating Device Pools

Your currently created device pools will be displayed by clicking the device pool field. Selecting a device pool from here will add it to the list of device pools. Multiple device pools can be selected this way.

Once the device pools have been selected , they will be added to the device pool table. These are the device pools that all the devices you have selected will be added to.

Once complete, you can click submit to save your changes.
