

Editing A User

Navigation

The User Edit dialog can be accessed from the [Users](#) page.

Overview

Here you can edit either your own information or the information of a user who has a lower role than you. The fields displayed may vary based on your current user role. The password fields will not be displayed if editing a user other than yourself.

Timezone

Here you can edit the user's timezone. This will affect the formatting of time on the system.

Language

Here you can select the language you would like to display the website in. Currently only English, French and Arabic is supported.

Setting A Dashboard Type

You can select a dashboard type from the dashboard drop down menu. This will affect what you view when 'Dashboard' is selected from the side navigation menu.

There are currently two types of dashboards:

- Sensor Dashboard - This is the default dashboard which displays sensor information.
- Device Dashboard - This dashboard is used primarily for SMRTCloud devices.

The screenshot shows a mobile application interface for updating a user. At the top, the title is "Update User" with a help icon. Below the title is a phone number field containing a South African flag, "(+27)", and the number "+27789632154". There is a "Notes" text area below that. Two password fields are present: "Password" and "Confirm Password", both with eye icons to toggle visibility. A "Preferences" section follows, containing four dropdown menus: "Dashboard*" set to "Device", "Theme*" set to "Light", "Language*" set to "English (en-gb)", and "Time Zone*" set to "(UTC+02:00) South Africa Standard Time". At the bottom of the preferences is a checkbox labeled "I consent to 3rd party technical support and facilitation" which is currently unchecked. At the very bottom of the form are two buttons: "Cancel" and "Submit".

Setting A New Password

You can adjust you current password by typing your new password in the password field and confirming the new password in the confirm password field.
