

Inviting A User

Navigation

The User Invite dialog can be accessed from the [Users](#) page.

Overview

Here you can invite users to your company via email.

User Email

Here you can enter the email address of the user you wish to invite. This can be a user registered on the system, or a user who is not yet registered. An unregistered user will be prompted to register an

account upon accepting the invitation.

Selecting A User Role

You can select a role for the user you wish to invite from the drop down menu. The list of available roles may vary based on your current role. The User role has read-only access to device pools that they have been assigned. The Manager role has limited edit access to devices, alert groups and reports and can only see device pools that they have been assigned. The Company Owner role has full access to all options.

user@example.com

Role

- User
- Manager
- Company Owner
- Reseller

Close Submit

Selecting Dashboard Type

You can select a dashboard type from the dashboard drop down menu. This will affect what the new user will see when 'Dashboard' is selected from the side navigation menu. There are currently two types of dashboards:

- Sensor Dashboard - This is the default dashboard which displays sensor information.
- Device Dashboard - This dashboard is used primarily for SMRTCloud devices.

N.B: This will only apply to new users. Users who already have an account will not have this setting applied.

Selecting A Devicepool

You can also allocate devicepools to a user upon invitation. Once the user registers, they will immediately be given access to the devicepool.
